Training Courses and Apprenticeships for your teams

Training modules and apprenticeships to help you

Apprenticeships

Umbrella Training have added newly revised Clinical Cleanliness modules to the hospitality suite of apprenticeships to support businesses with looming skill shortages and emerging training needs.

In light of the pandemic and its recent impact on the hospitality sector, Umbrella Training have worked with industry professionals to create these modules that will support all roles in any hospitality business and create firm understanding of the new world of viral control and prevention.

These are fully funded and available to all members across England who have an apprenticeship levy or smaller businesses who would like to access SME apprenticeships funds.
